

Requirements

Interested speakers are invited to submit an abstract (max. 500 words) describing the main ideas of their paper together with an author's CV (max. 200 words).

For any further conference correspondence one main contact with complete address and position should be named who must be one of the paper's authors.

Each speaker gets a presentation time of 20 minutes with additional 10 minutes for discussion. All presented papers will be published in the conference proceedings and distributed to the conference attendees.

Conference language: English

All required data should be submitted via e-mail as MS Word or PDF file to:

Mr. Dennis Fandrich, fandrich@eitep.de

Deadline for submission: 31 December 2006.

Conference Committee

Chairman:

- Dr. Klaus Ritter, EITEP

Members (status as of 21 Sept. 2006):

- Lars Bangert, ILF Consulting Engineers
- Karl Gassner, TAL
- Dr. Achim Hilgenstock, E.ON Ruhrgas AG
- Bernd Pirschtat, E.ON Engineering GmbH
- Dr. Kurt M. Reinicke, TU Clausthal
- Josef Schmid, WEG
- Dr. Kurt Schubert, OMV
- Prof. Thomas Wegener, IRO

Pipeline Technology 2007

Leading Trade Fair and Conference for
Pipeline Technologies and Systems

Call for Papers

Pipeline Technology Conference

Conference
Organiser

16 - 17 April 2007
Hannover - Germany

www.pipeline-technology-hannover.com

Background

The Pipeline Technology Leading Trade Fair and Conference is a new international platform for products, systems and services relating to the transport of oil, gas and water. The focus will be the entire value added chain – from planning, construction and operation to maintenance and repair. All these aspects will be discussed during the conference.

The Pipeline Technology Conference combines all pipeline related topics. As part of HANNOVER MESSE (16-20 April 2007) this new conference benefits from synergies of the world's most important technology event – particularly from "INTERKAMA*" and the "Energy".

The conference features sessions dedicated to exploring current and future options for the pipeline-based transportation of oil, gas and water. Workshops will examine R&D in the different sectors mentioned in this call for papers.

Expected conference participants include decision-makers from industry, public utilities, government policymakers, investors, research scientists and engineers from around the globe. **High-ranking delegations** from Asia (China, Central and South East Asia), Middle East and North Africa are expected to attend the Pipeline Technology 2007 Conference.

The conference will feature lectures and presentations by utility providers, engineering firms, transport operators, industry associations, industrial providers and users, municipal authorities, etc. on all aspects surrounding pipeline systems. Interested parties are invited to submit lecture and presentation proposals.

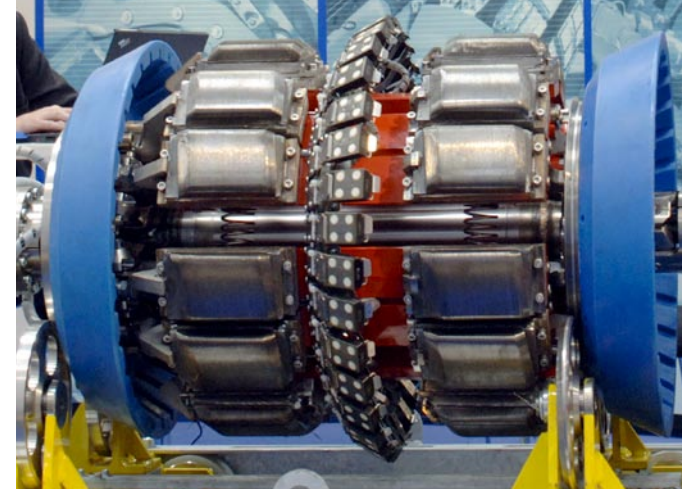

Conference

Pipeline Technology 2007 Conference

Part of HANNOVER MESSE 2007, Germany

Venue: Convention Center CC

Date: 16 - 17 April 2007, 9:00 - 16:00

Topics of the Conference

Design and Construction

- Optimisation and Acceleration of Construction
- Pipeline Components
- GIS / Database Development
- Renovation

Operation and Maintenance

- Pipeline Integrity
- Inspection and Leak Detection
- Control and Dispatching
- Rehabilitation

Special Issues

- LNG versus Pipeline
- Third Party Impact
- Key Projects
- Human Resources Development
- Environmental Issues
- Standards and Regulations
